- Passively Safe to EN12767 (100.NE.4)
- CE Certified to EN12899-3 (2007)
- Easy & quick to install, move or replace
- Can be used with Retention socket
- 100% Recyclable

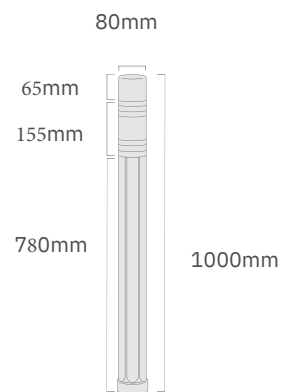

Details

PencilFlex bollards from PWS are the ideal solution for delineation and improving safety at school locations. Designed for use on Safe Routes to School Schemes, they are fully impact resistant and reboundable - but also tough and durable at the same time. Their unique twin-wall PU construction ensures they will survive multiple impacts from vehicles and continue to provide a visible hazard warning & definition for all road users.

PencilFlex bollards are fully crash tested and are CE certified (EN12899-3(2007)). They are very quick to install and remove or relocate. PWS offer three different mounting options - Screw-In, Baseplate and Retention Socket. The Screw-In method offers the quickest installation - just drill a single hole in the road surface or pavement, put some glue/resin in the hole (supplied with the bollard) and insert the bollard. After 10 minutes, the bollard is fully installed and ready for use. Removal is simple - using a tool available from PWS, simply loosen the bollard, and unscrew it from the ground.

PencilFlex bollards are available in 4 colours - Yellow, Red, Green & Blue. Special colours are available on request, subject to minimum manufacturing quantities. The bollards offer exceptional value, are environmentally friendly and are 100% recyclable.

Specifications

Colours: Yellow, Red, Green, Blue

Material: (PU) Polyurethane

Height: 1000mm

Diameter: 80mm

Mounting Options: Screw-In, Baseplate & Retention Socket

Available in Yellow, Red, Green & Blue

Screw-In/Resin

4- Bolt Baseplate

Retention Socket
